Profile

Driven Data Science and AI student at Princess Sumaya University of Technology with hands-on experience in Data Analysis, Visualization, Cleaning and machine learning. Blending technical expertise with real-world insight from both academic and entrepreneurial roles.

Education

Princess Sumaya University of Technology | Amman, Jordan ***Oct 2022 – June 2026***
Bachelor's in data science & AI
Predicted Grade: Very Good

Islamic Educational College | Amman, Jordan ***September 2017 – July 2022***
National degree Grade: 94.7

Work Experience

AI Intern | BMB Global **Oct 2025 – Present**
Working with libraries such as **TensorFlow**, **Flask**, **Ultralytics** and Labeling using **Roboflow** to develop computer vision applications, Optimized data engineering workflows using **Apache Airflow**, while collecting, cleaning, and building databases to support assigned tasks.

Projects

Web scraping | Princess Sumaya University of Technology **April 2024 – June 2024**
Extracted structured data from web tables using Python libraries and built a knowledge graph to represent the information; utilized **SPARQL** queries for efficient data retrieval and analysis.

Brain Tumor segmentation and classification | Graduation Project **Nov 2025 – Present**
Developing an end-to-end medical imaging system for automated brain tumor analysis, utilizing **nnU-Net** for high-precision volumetric segmentation and **LLaVA-Med** for automated clinical reporting. We will also implement **radiologist-friendly UI** to view 3D mask visualization and output a full report.

Skills

Languages: Arabic (Native), English (Fluent)
Technical Skills:
- **Programming:** Python, SQL, R, C++
- **Machine Learning & AI:** TensorFlow, ANN, CNN, RNN, nnU-Net, LLaVA-Med, Annotation (Roboflow)
- **Data Engineering & DevOps:** Apache Airflow, Docker, Database Design.
- **Specializations:** Natural Language Processing (NLP), Computer Vision, Data Visualization
- **Data Transformation:** Microsoft Excel
- **Optimization:** CPLEX
